

BENZING ClubSystem

Easy

Secure

Innovative

Advances

For the enjoyable work in the club

The new BENZING ClubSystem is available! It is even better than clubPOINT and CAN, as the functionalities of both units have now been combined into a single unit, the BENZING ClubSystem. All of the tasks within the Club have now become child's play, based on the well-known user friendliness of the BENZING M1.

Facts:

- Modern design with CAN and clubPOINT in a single unit
- Large time and date display
- Support for a radio clock and GPS clock
- Keys to manually set the date and time
- Additional USB port for the PC
- Easily accessible connections
- Loud acoustic signals
- Improved and faster reading/writing of the electronic chip rings
- Easy software download
- Support for almost existing chip rings including the new HITAG-S chip ring

BENZING ClubSystem - For the enjoyable work in the club

Large time and date display

Always the right time! The easy-to-read display of the date and time in large letters and numbers always clearly displays the time, which is used to set the clock, or against which it is compared. The display corresponds similarly to the one on the BENZING M1.

Modern design with CAN and clubPOINT in a single unit

The BENZING ClubSystem combines the functionalities of CAN and clubPOINT into a single unit and does not require any cables. Already at first sight, it is clear that the ClubSystem originates from the BENZING series. Its highly designed exterior combines the characteristics of the BENZING Station and the BENZING M1.

Support of the radio clock and GPS clock

The new BENZING ClubSystem supports all radio clocks delivered to date, with or without a display. It is now also possible to connect a GPS receiver in order to always have the exact time, anywhere in the world.

Keys to manually set the date and time

If no radio signal is available, the date and time can easily be set using a simple menu on the BENZING ClubSystem.

Additional USB port for the PC

Next to the standard serial RS232 port, the new BENZING ClubSystem also has an integrated USB port, to where modern PCs and laptops can be directly connected. Every major fancier administration software supports this USB interface.

Easily accessible connections

All connections on the BENZING ClubSystem are positioned to be easily accessible. The PMDIN

connections are located on the side, which facilitates easy connection and disconnection.

Loud acoustic signals

A special, powerful loudspeaker integrated into the new ClubSystem signals any action distinctively. The volume can easily be adjusted with a controller.

Improved and faster reading/writing of the chip rings

The BENZING ClubSystem is equipped with a new type of RFID unit for better reading and writing electronic chip rings. This technology is also used in the Lazer (PLB) antenna. Therefore the reading range and the speed to basket a pigeon is increased.

Compatible with the existing Club cables

All existing Club cables and keys are compatible with the new BENZING ClubSystem. It is therefore easy to migrate from the old club system to the new BENZING ClubSystem.

Support of all existing chip rings as well as the new HITAG-S chip ring

Just like the atis Club system, the new BENZING ClubSystem supports a large variety of chip rings. BENZING's technological vision is demonstrated by the fact that the new ClubSystem is already compatible with the HITAG-S chip ring, which will present many excellent benefits to the fanciers.

Easy software download

Easy download via computer! Thanks to the PC connection, updating the software has never been easier.
